вкусовщина, но если будешь что-то править рядом: кажется, импорты смотреть, имхо

Reply  ...

```
<PublicationDate year={ 202
```

[\[blurred\]](#) 15

☒ три в столбец

Reply  ...

[\[blurred\]](#) 13 Oct 2021 [↗](#)

☒ Лишний отступ

Reply  ...

[\[blurred\]](#) 31 May 2021 [↗](#)

☒ После констант добавляем пустую с

Reply · Edit  ...

```
const moneyCeilFloat = (amount, divider, decimalPlaces = 1) => {
```

[\[blurred\]](#) 07 Oct 2021 [↗](#)

☒ `decimalPlaces = 1` - в аргументах лишний, так как ни где не используется.

Reply · Edit  ...

☒ тут похоже лишняя стр

Reply  ...

AS IS

TO DO

Plan

1

экскурс
в историю

2

сборка
сильного
конфига

3

оптимизация
скорости

4

prettier в связке
с eslint

5

nrm-модуль
с eslint-конфигом

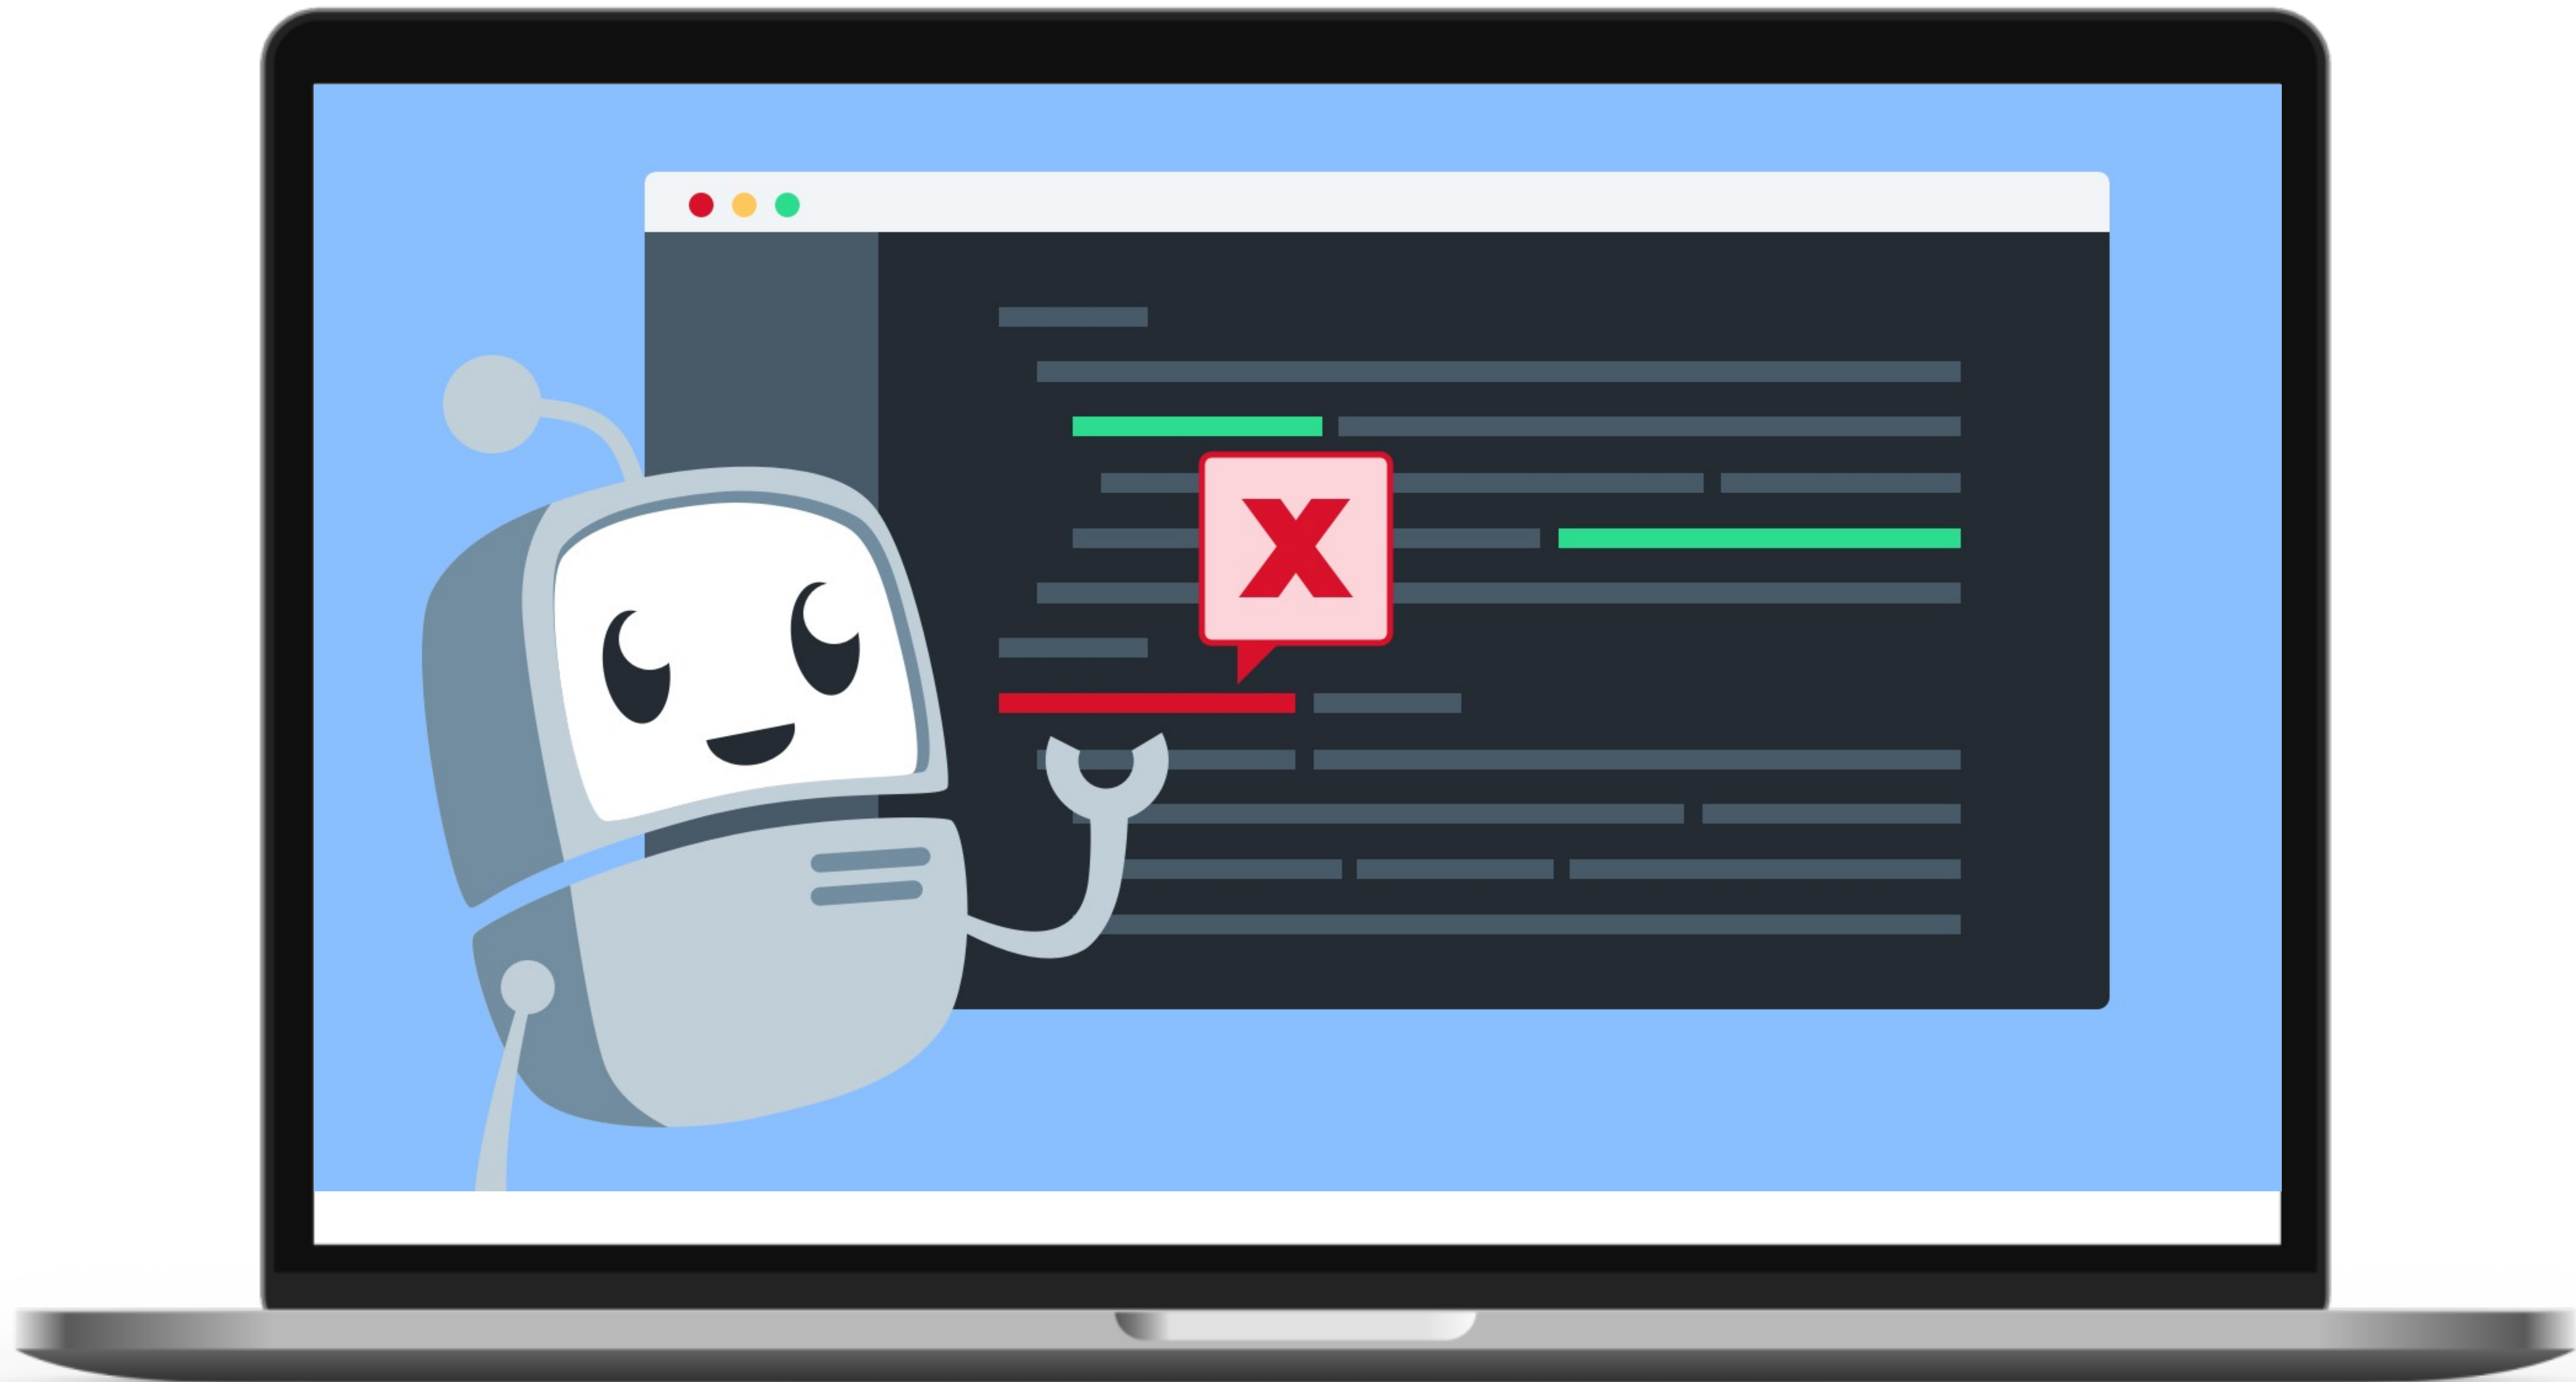

6

стратегия
внедрения нового
конфига в проект

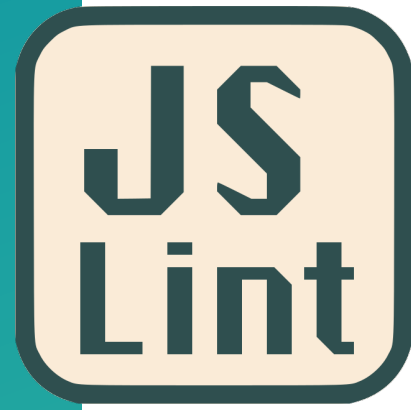

HISTORY

ESLint

2002

2011

2013

CONFIG

Print

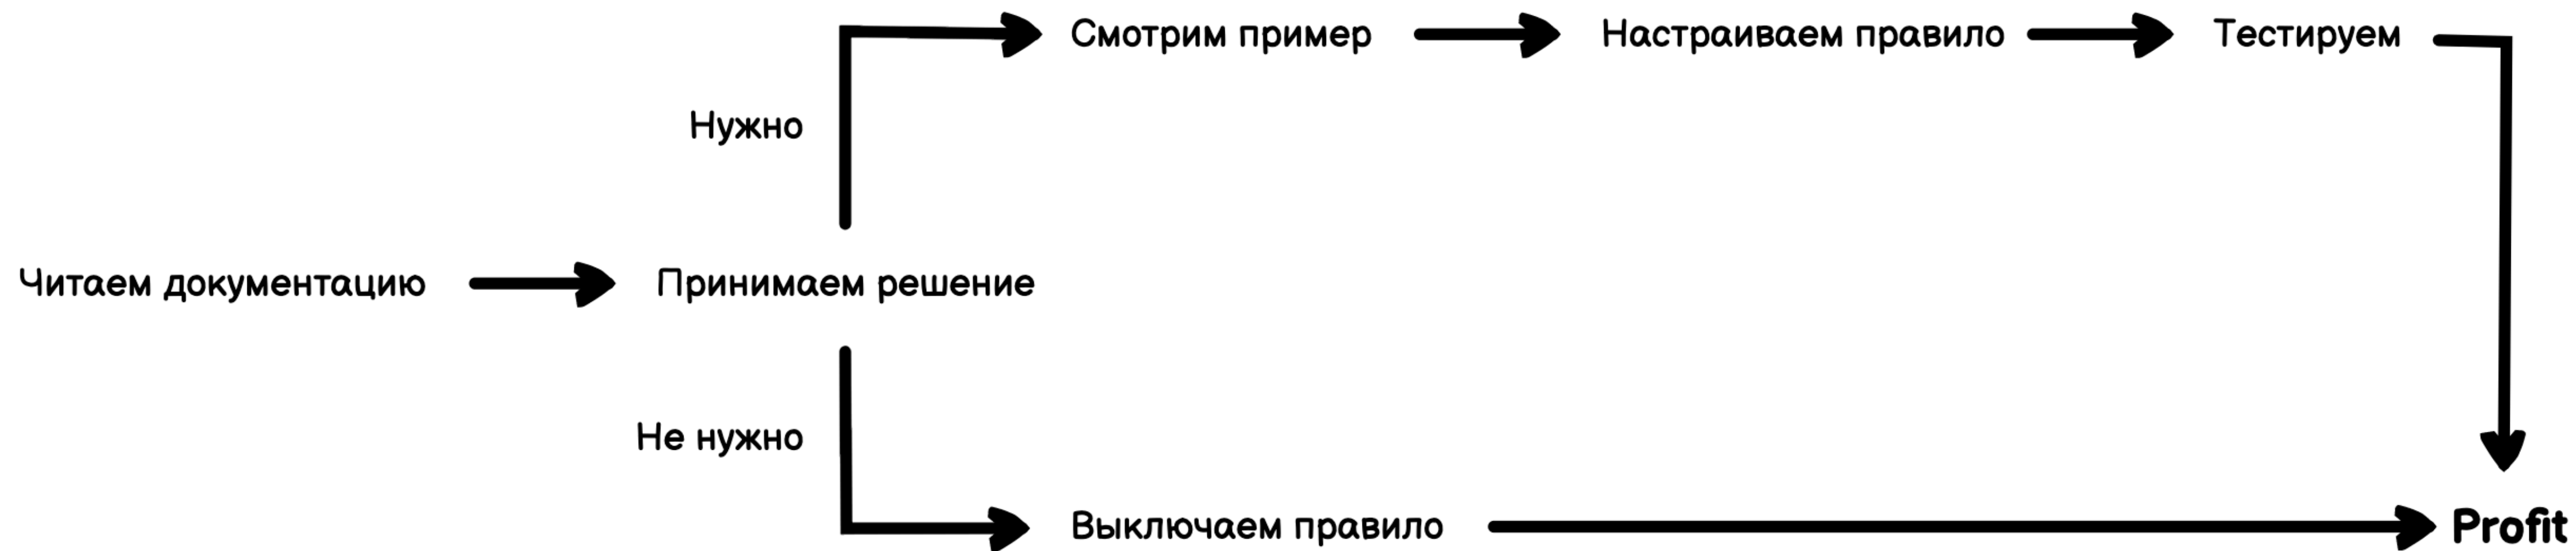

Наследование

Пример

```
eslint --print-config .eslintrc.json > result.json
```

```
{  
  "extends": [  
    "plugin:@domclick/base",  
    "plugin:@domclick/reactConfig"  
  ],  
  "settings": {  
    "import/resolver": {  
      "webpack": {  
        "config": "../webpack/prod.js"  
      }  
    }  
  }  
}
```

```
} {  
  "env": {  
    "browser": true,  
    "node": true,  
    "es2021": true,  
    "jest": true,  
    "serviceworker": true  
  },  
  "globals": {},  
  "parserOptions": {  
    "ecmaFeatures": {  
      "jsx": true  
    },  
    "sourceType": "module",  
    "ecmaVersion": 2018  
  },  
  "plugins": [  
    "import",  
    "sonarjs",  
    "optimize-regex",  
    "@babel",  
    "react",  
    "react-hooks",  
    "jsx-ally"  
  ],  
  "rules": {  
    "react/display-name": [
```

Awesome ESLint

Example

1

eslint-plugin-react

2

eslint-plugin-react-hooks

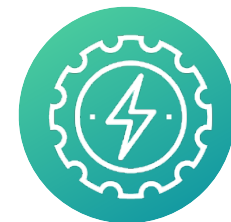

3

eslint-plugin-jsx-a11y

Example

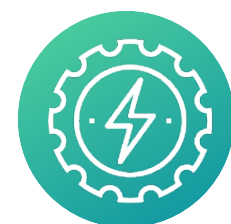

eslint-plugin-import

eslint-import-resolver-webpack

eslint-import-resolver-alias

eslint-import-resolver-typescript

```
{
  "extends": [
    "plugin:@domclick/base",
    "plugin:@domclick/reactConfig"
  ],
  "settings": {
    "import/resolver": {
      "webpack": {
        "config": "./webpack/prod.js"
      }
    }
  }
}
```

Example

1

eslint-plugin-sonarjs

2

**eslint-plugin-optimize-
regex**

Example

1

eslint-plugin-jest

2

eslint-plugin-jest-dom

3

eslint-plugin-testing-library

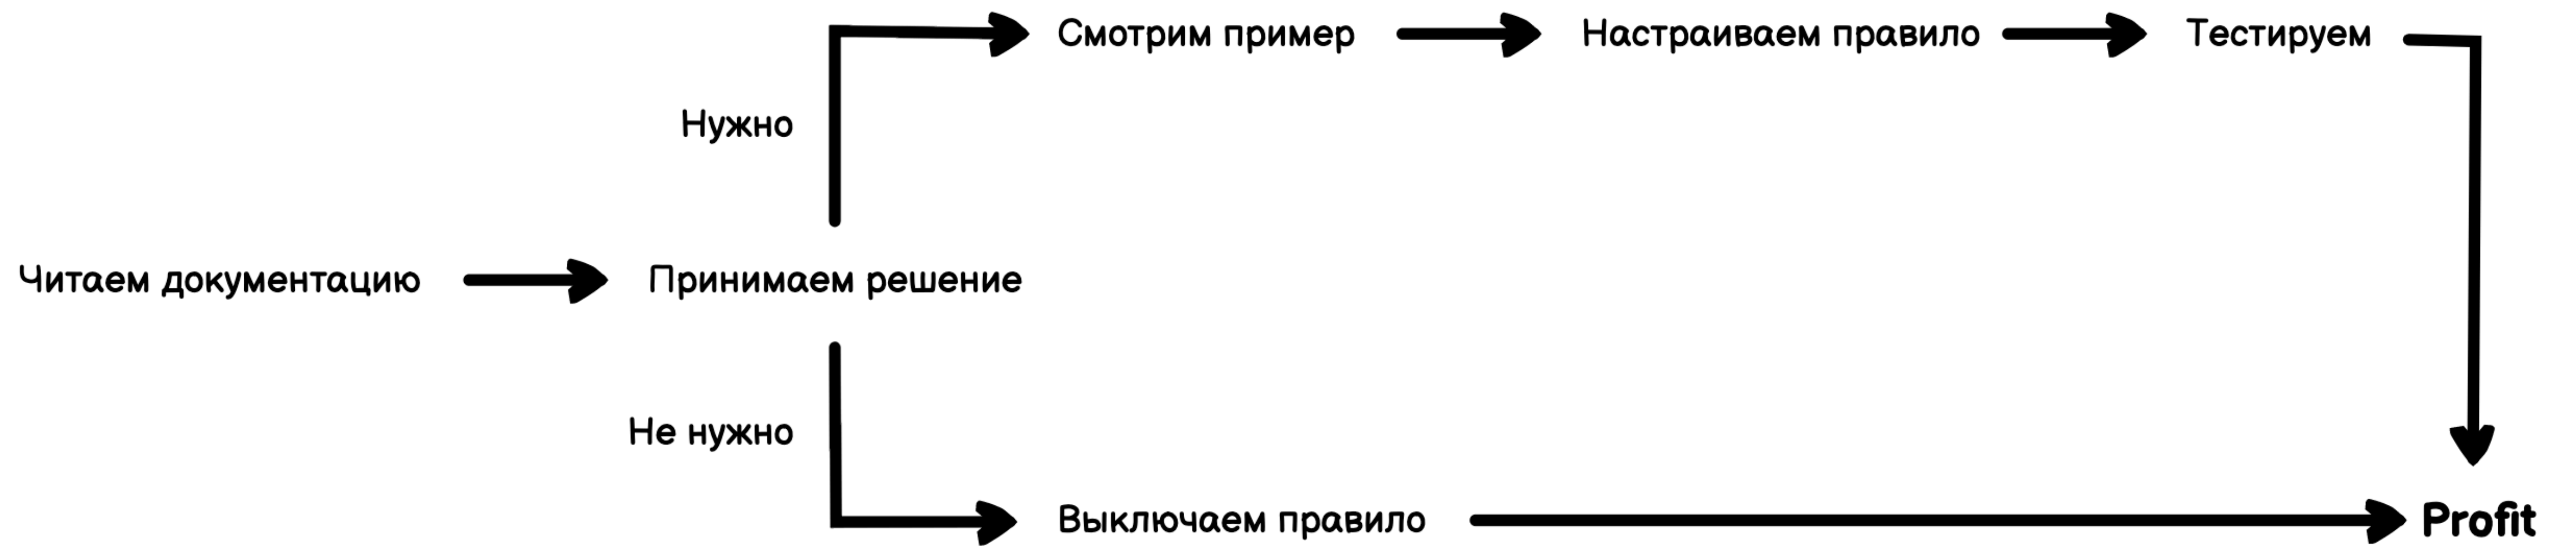

Example

1

@babel/eslint-plugin

2

@typescript-eslint

OPTIMIZATION

TIMING=1 npm run lint

| Rule | Time (ms) | Relative |
|-----------------------------------|-----------|----------|
| :----- | -----: | -----: |
| import/no-cycle | 3415.376 | 70.3% |
| import/no-deprecated | 629.206 | 13.0% |
| indent | 73.903 | 1.5% |
| import/no-extraneous-dependencies | 48.053 | 1.0% |
| import/no-unresolved | 48.045 | 1.0% |
| import/order | 47.378 | 1.0% |
| import/no-unused-modules | 40.269 | 0.8% |
| array-bracket-newline | 32.267 | 0.7% |
| no-unused-vars | 26.885 | 0.6% |
| import/namespace | 19.251 | 0.4% |

Possible moves

1

проапдейтить
плагин/конфиг
до latest-версии

2

проверить,
есть ли issue

3

отключить
правило

4

использовать
overrides

```
overrides: [  
  {  
    files: '**/?(*.)+(spec|test).[jt]s?(x)',  
    extends: [  
      'plugin:jest-dom/recommended',  
      'plugin:jest/all'  
    ],  
    rules: {  
      /* turn off or enable and configure rules */  
      'jest/no-hooks': 'off',  
      'jest/prefer-expect-assertions': ['error', { onlyFunctionsWithAsyncKeyword: true }],  
      'max-lines': 'off'  
      /* and so on till the end... */  
    }  
  }  
]
```

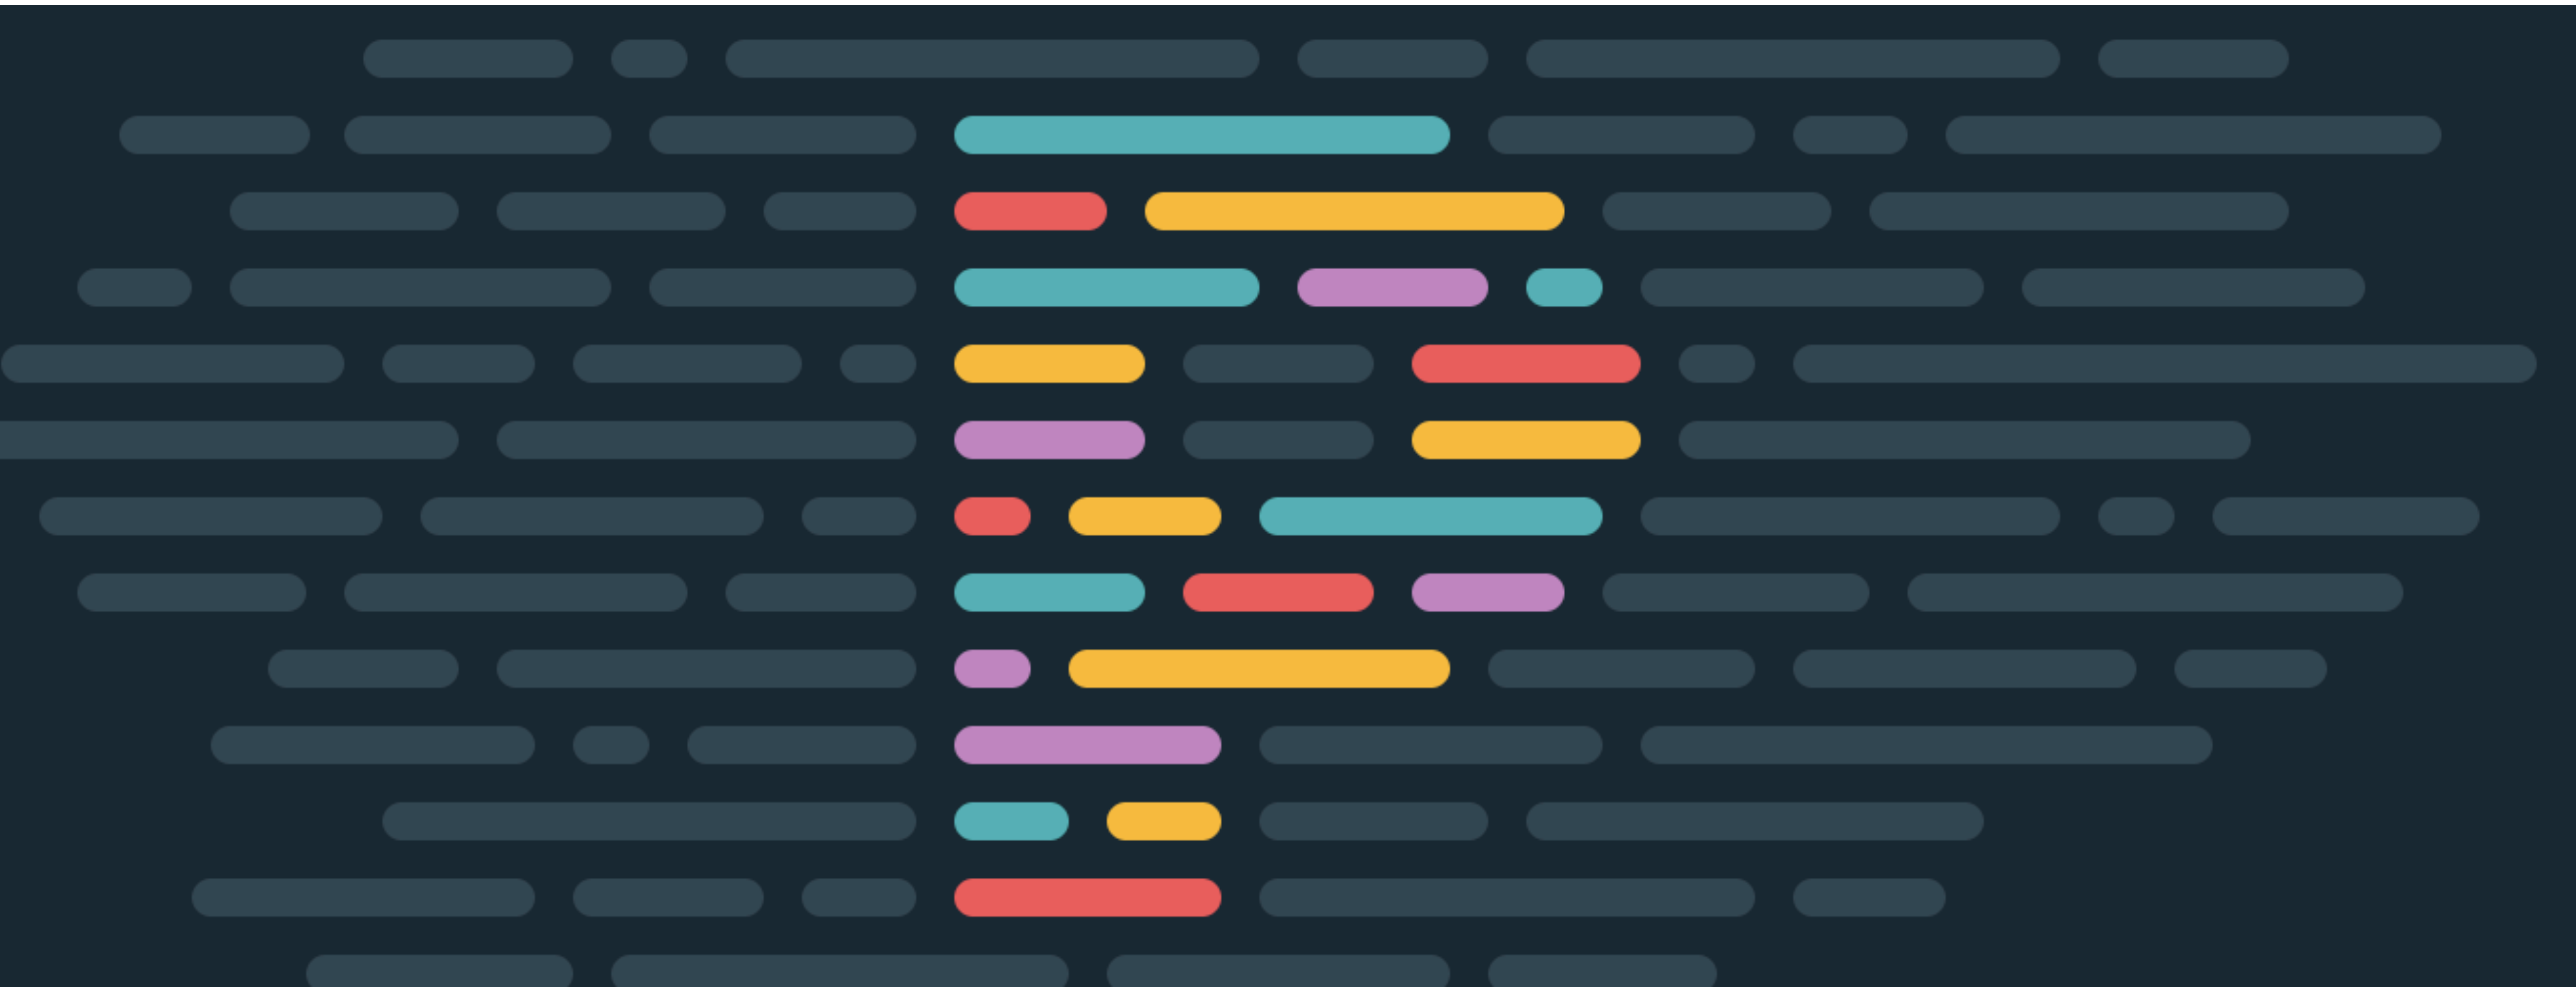

time npm run lint

49.18s user 3.81s system 120% cpu 43.957 total

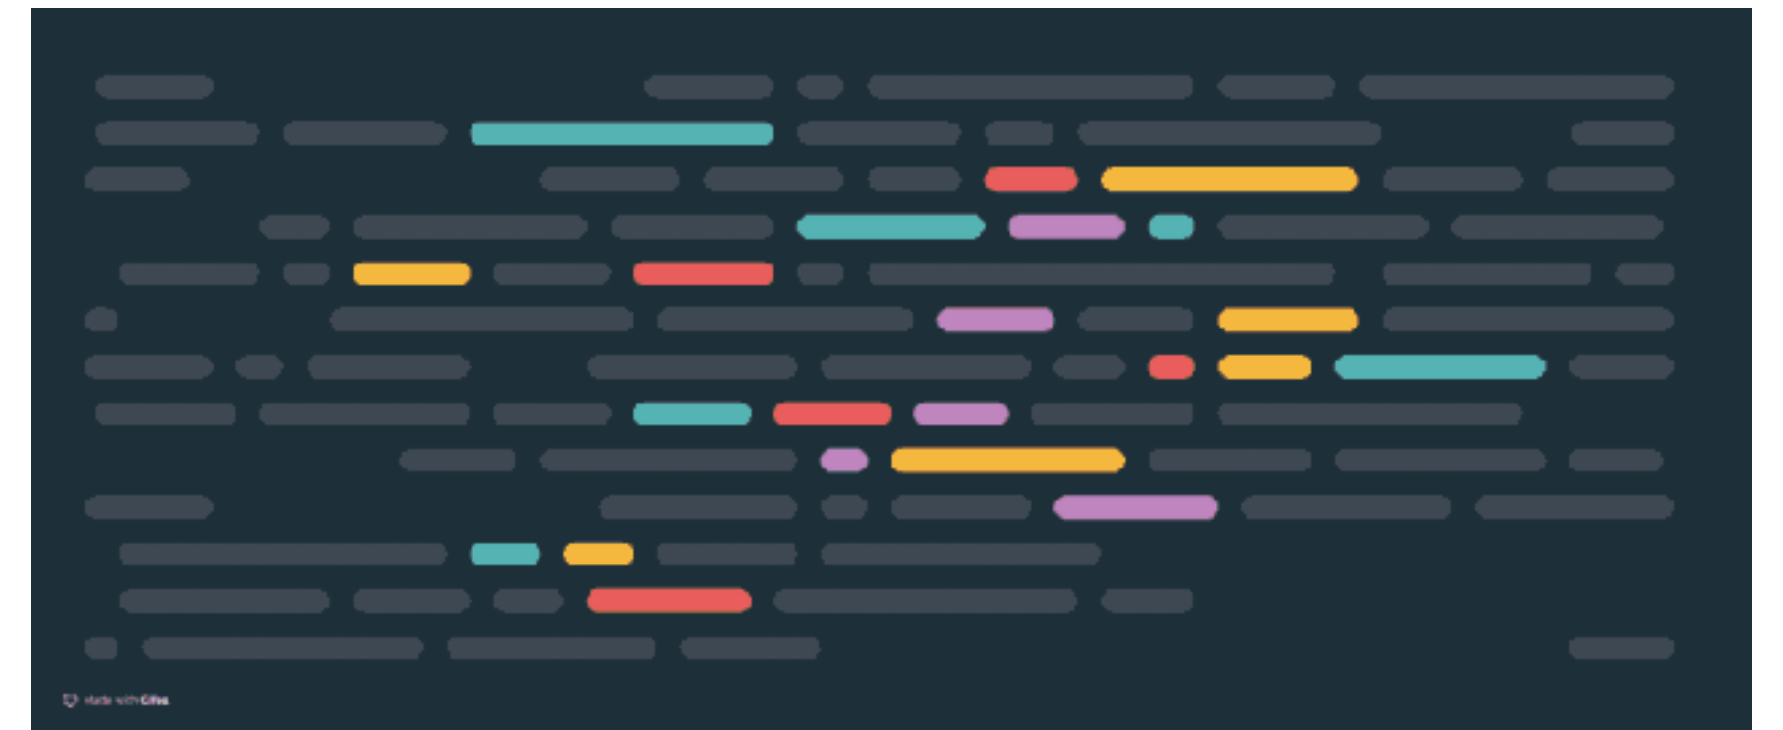

Measure-Command { npm run lint }

PRETTIER

IN OTHER WORDS, USE PRETTIER
FOR FORMATTING AND LINTERS
FOR CATCHING BUGS!

Benefit

быстрее

самостоятельное

правит
форматинг
не только js-like-
расширений

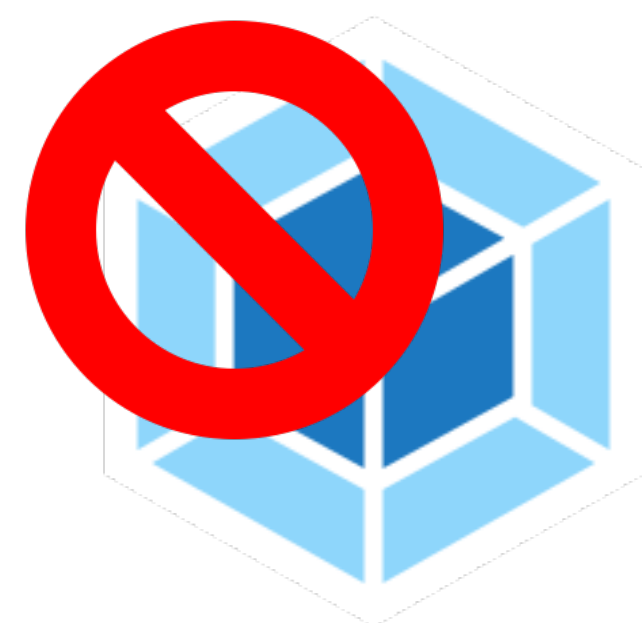

???

HOW TO SHARE

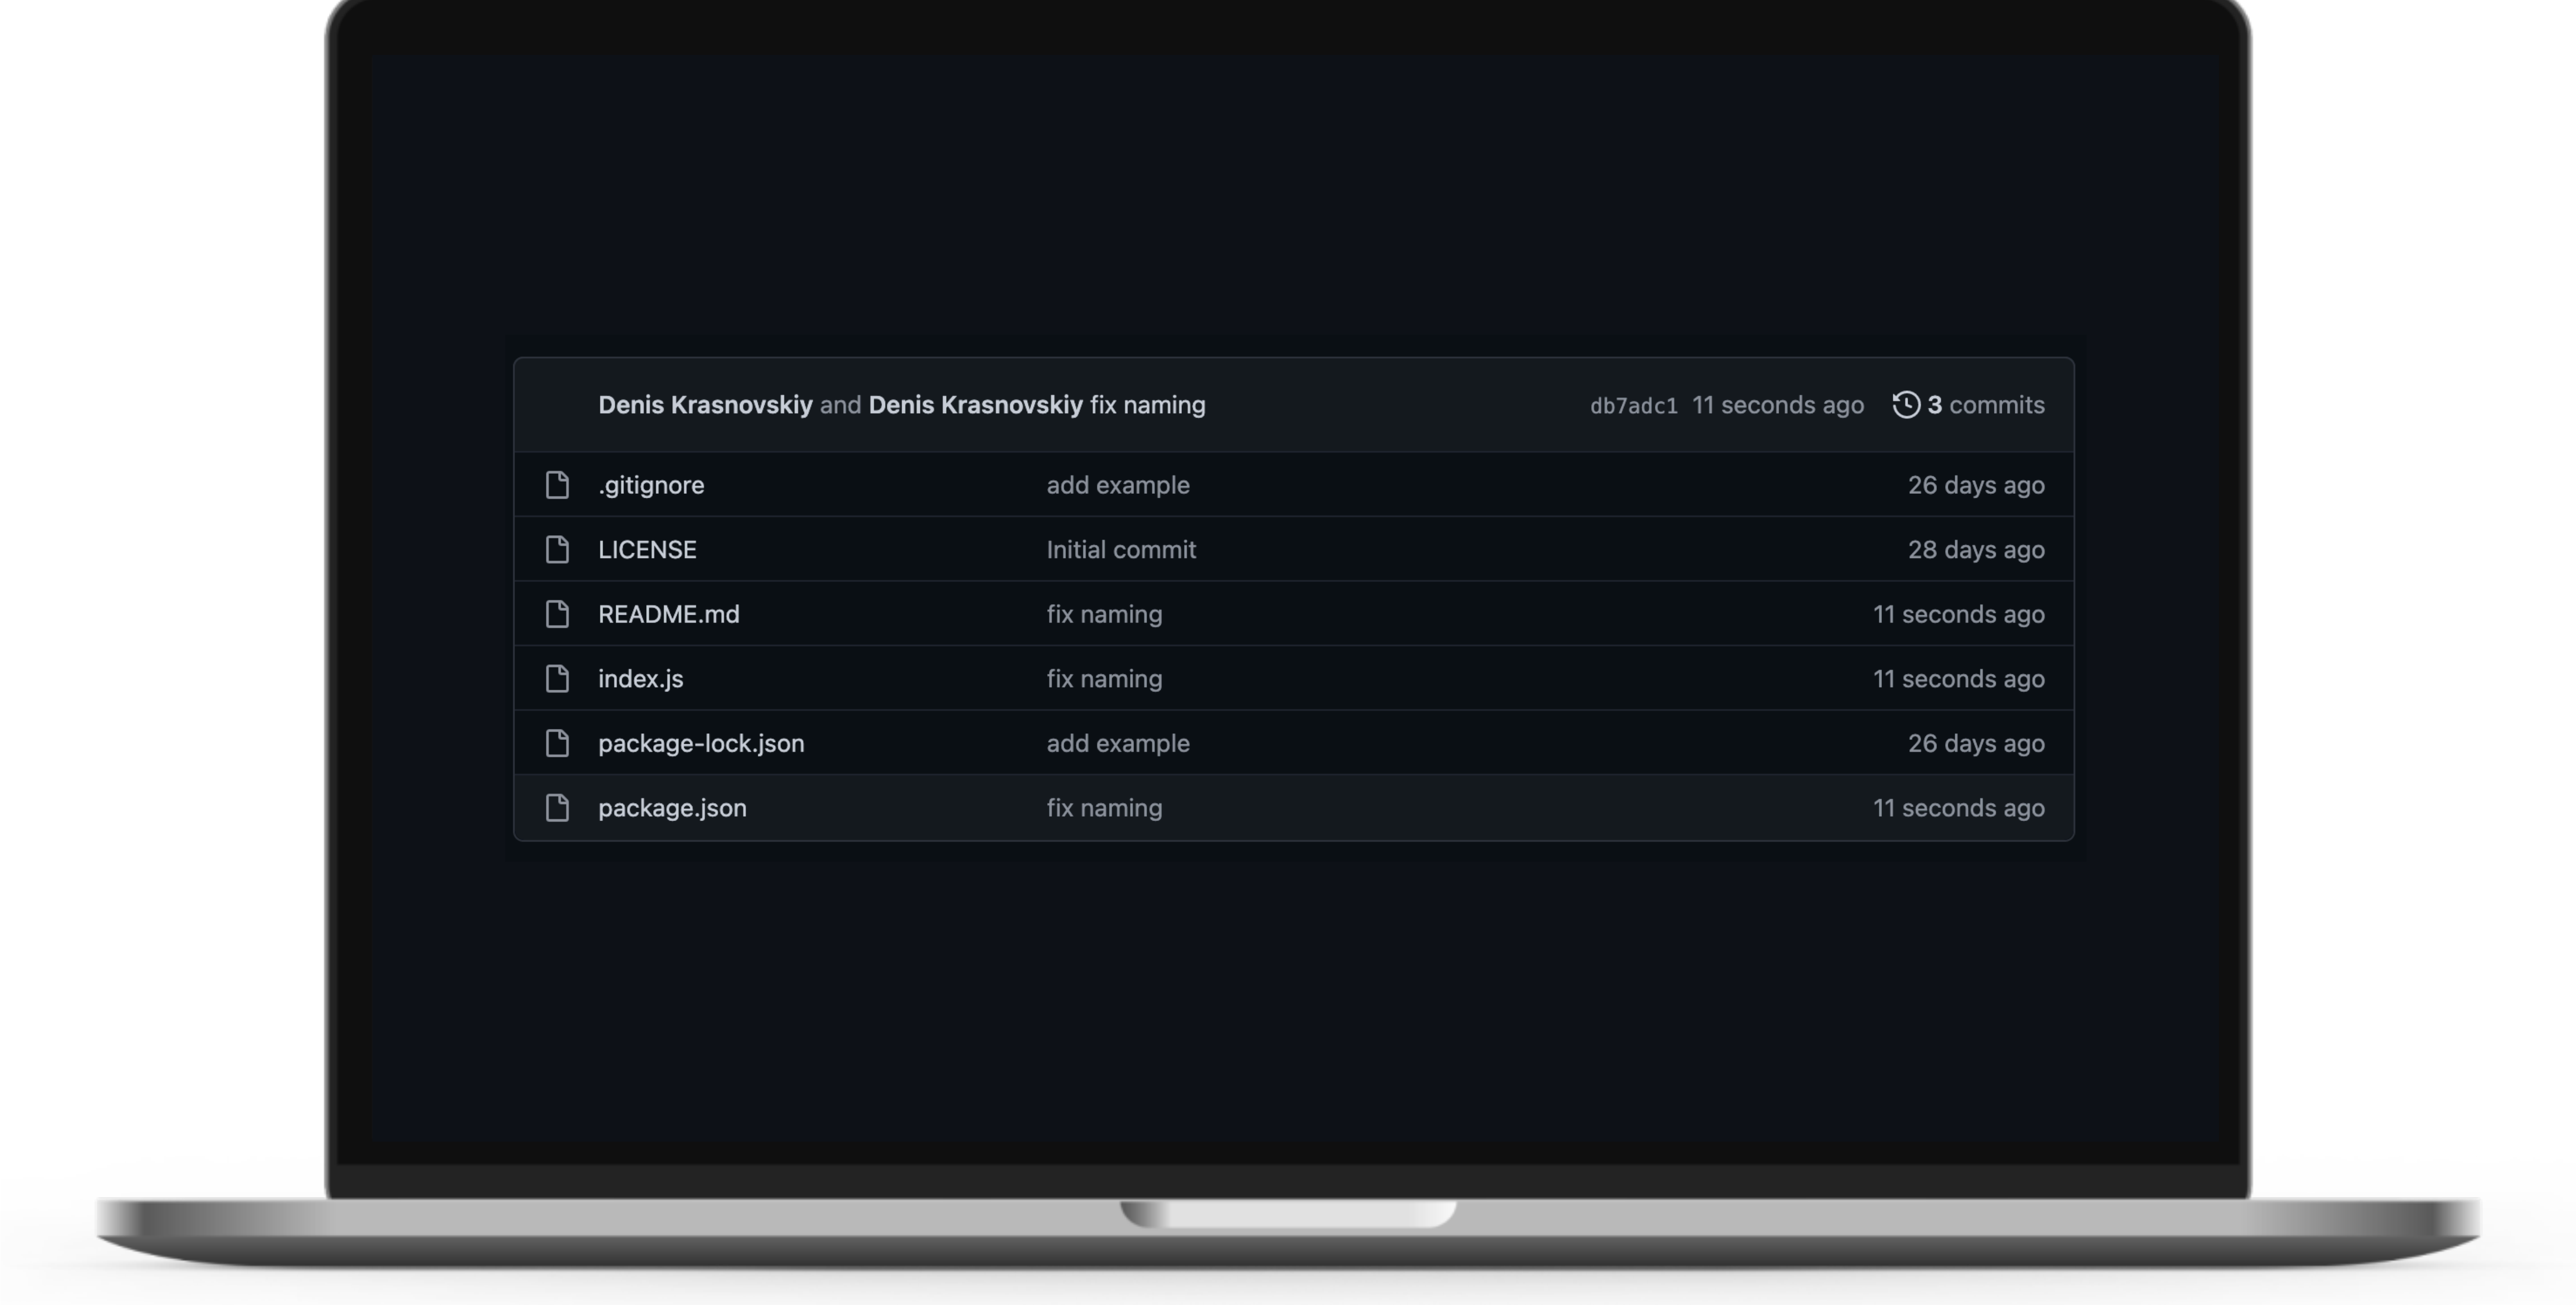

```
"name": "eslint-config-domclick",  
"extends": "domclick",
```

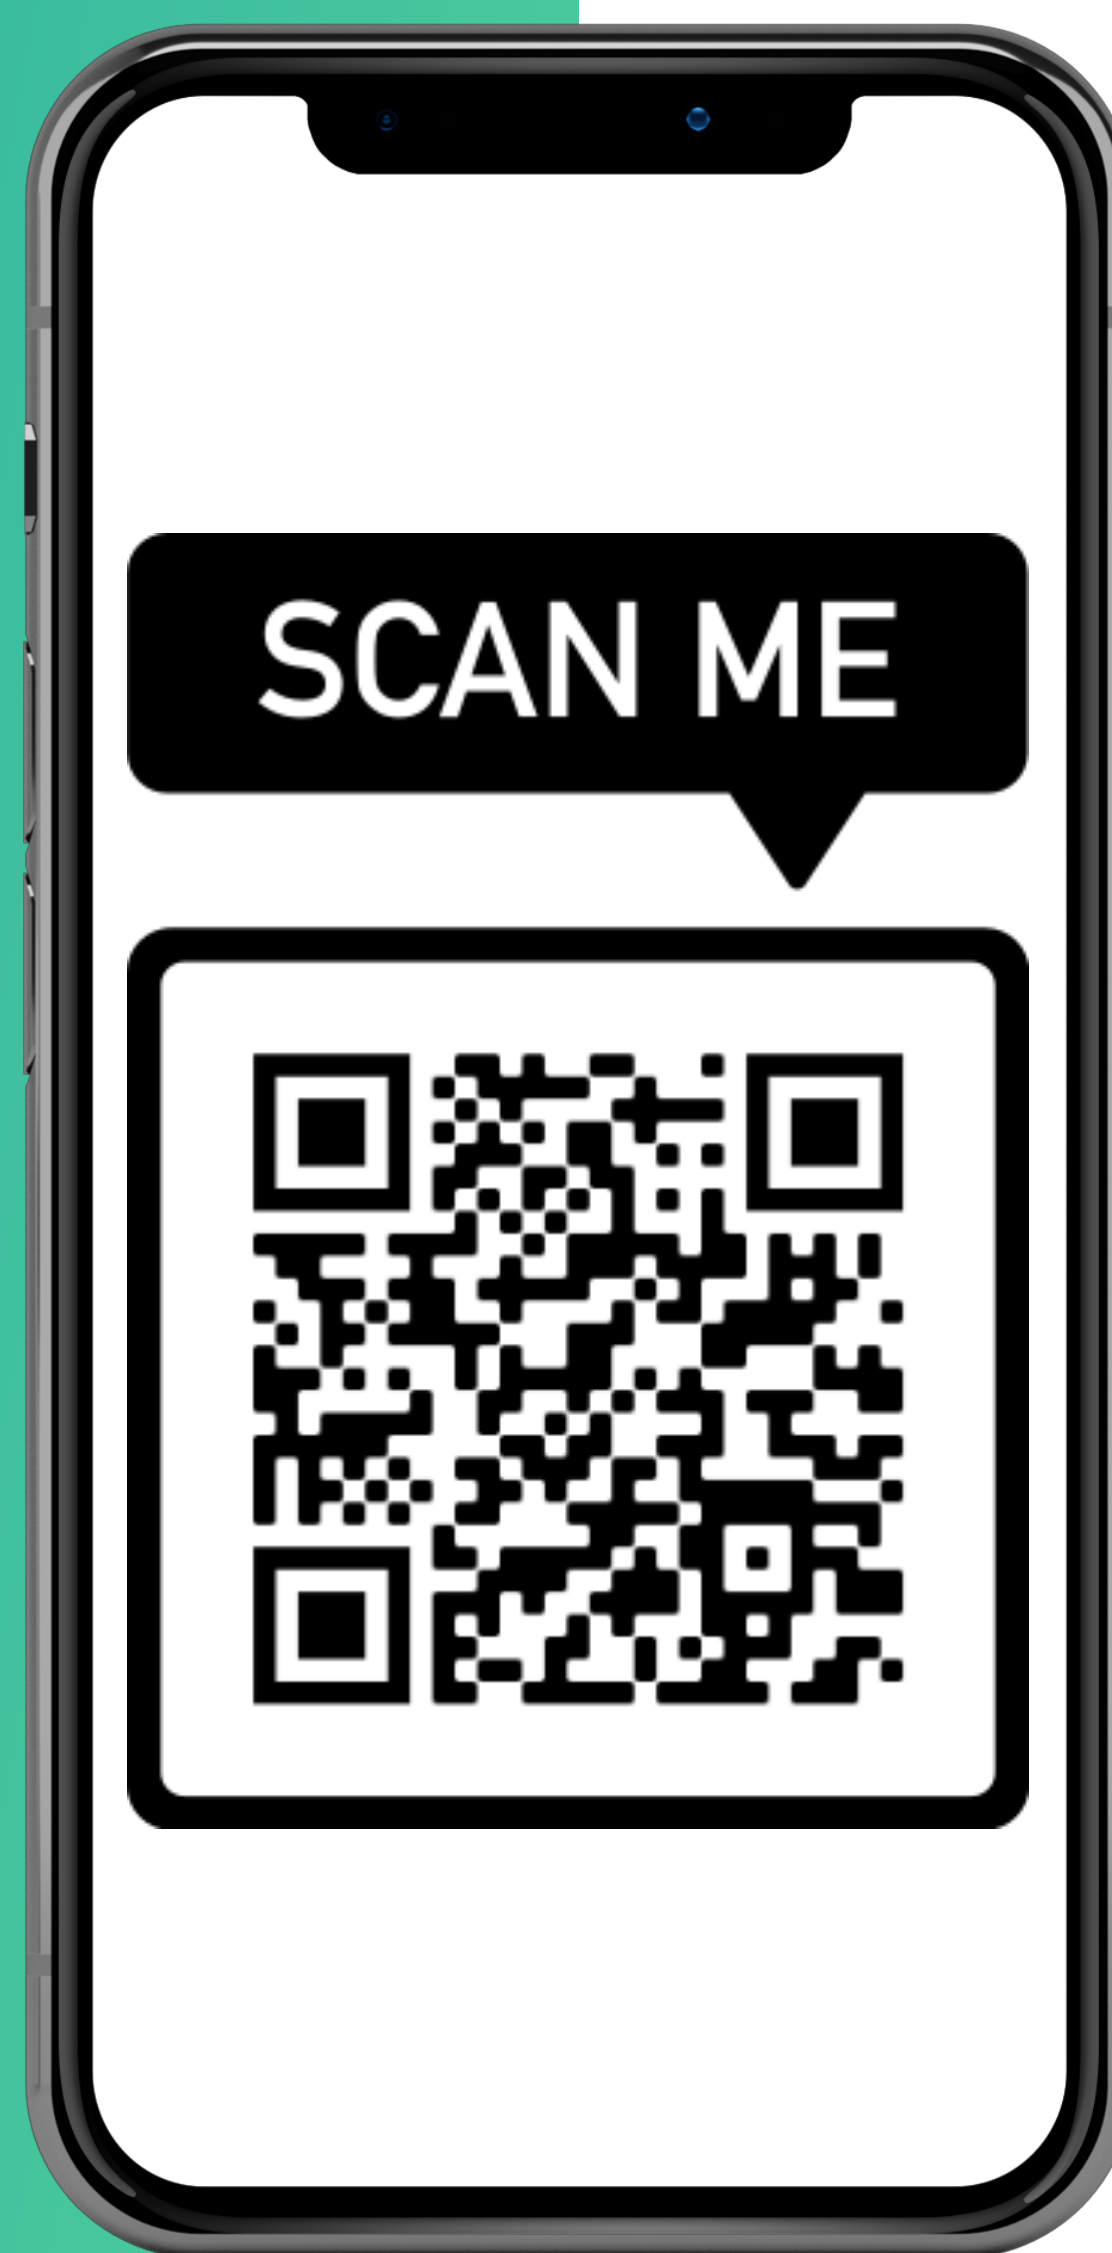

```
"name": "@domclick/eslint-config",  
"extends": "@domclick",
```

webpack

| Denis Krasnovskiy and Denis Krasnovskiy fix naming | | | db7adc1 11 seconds ago | 🕒 3 commits |

Testing

npm link

yarn link

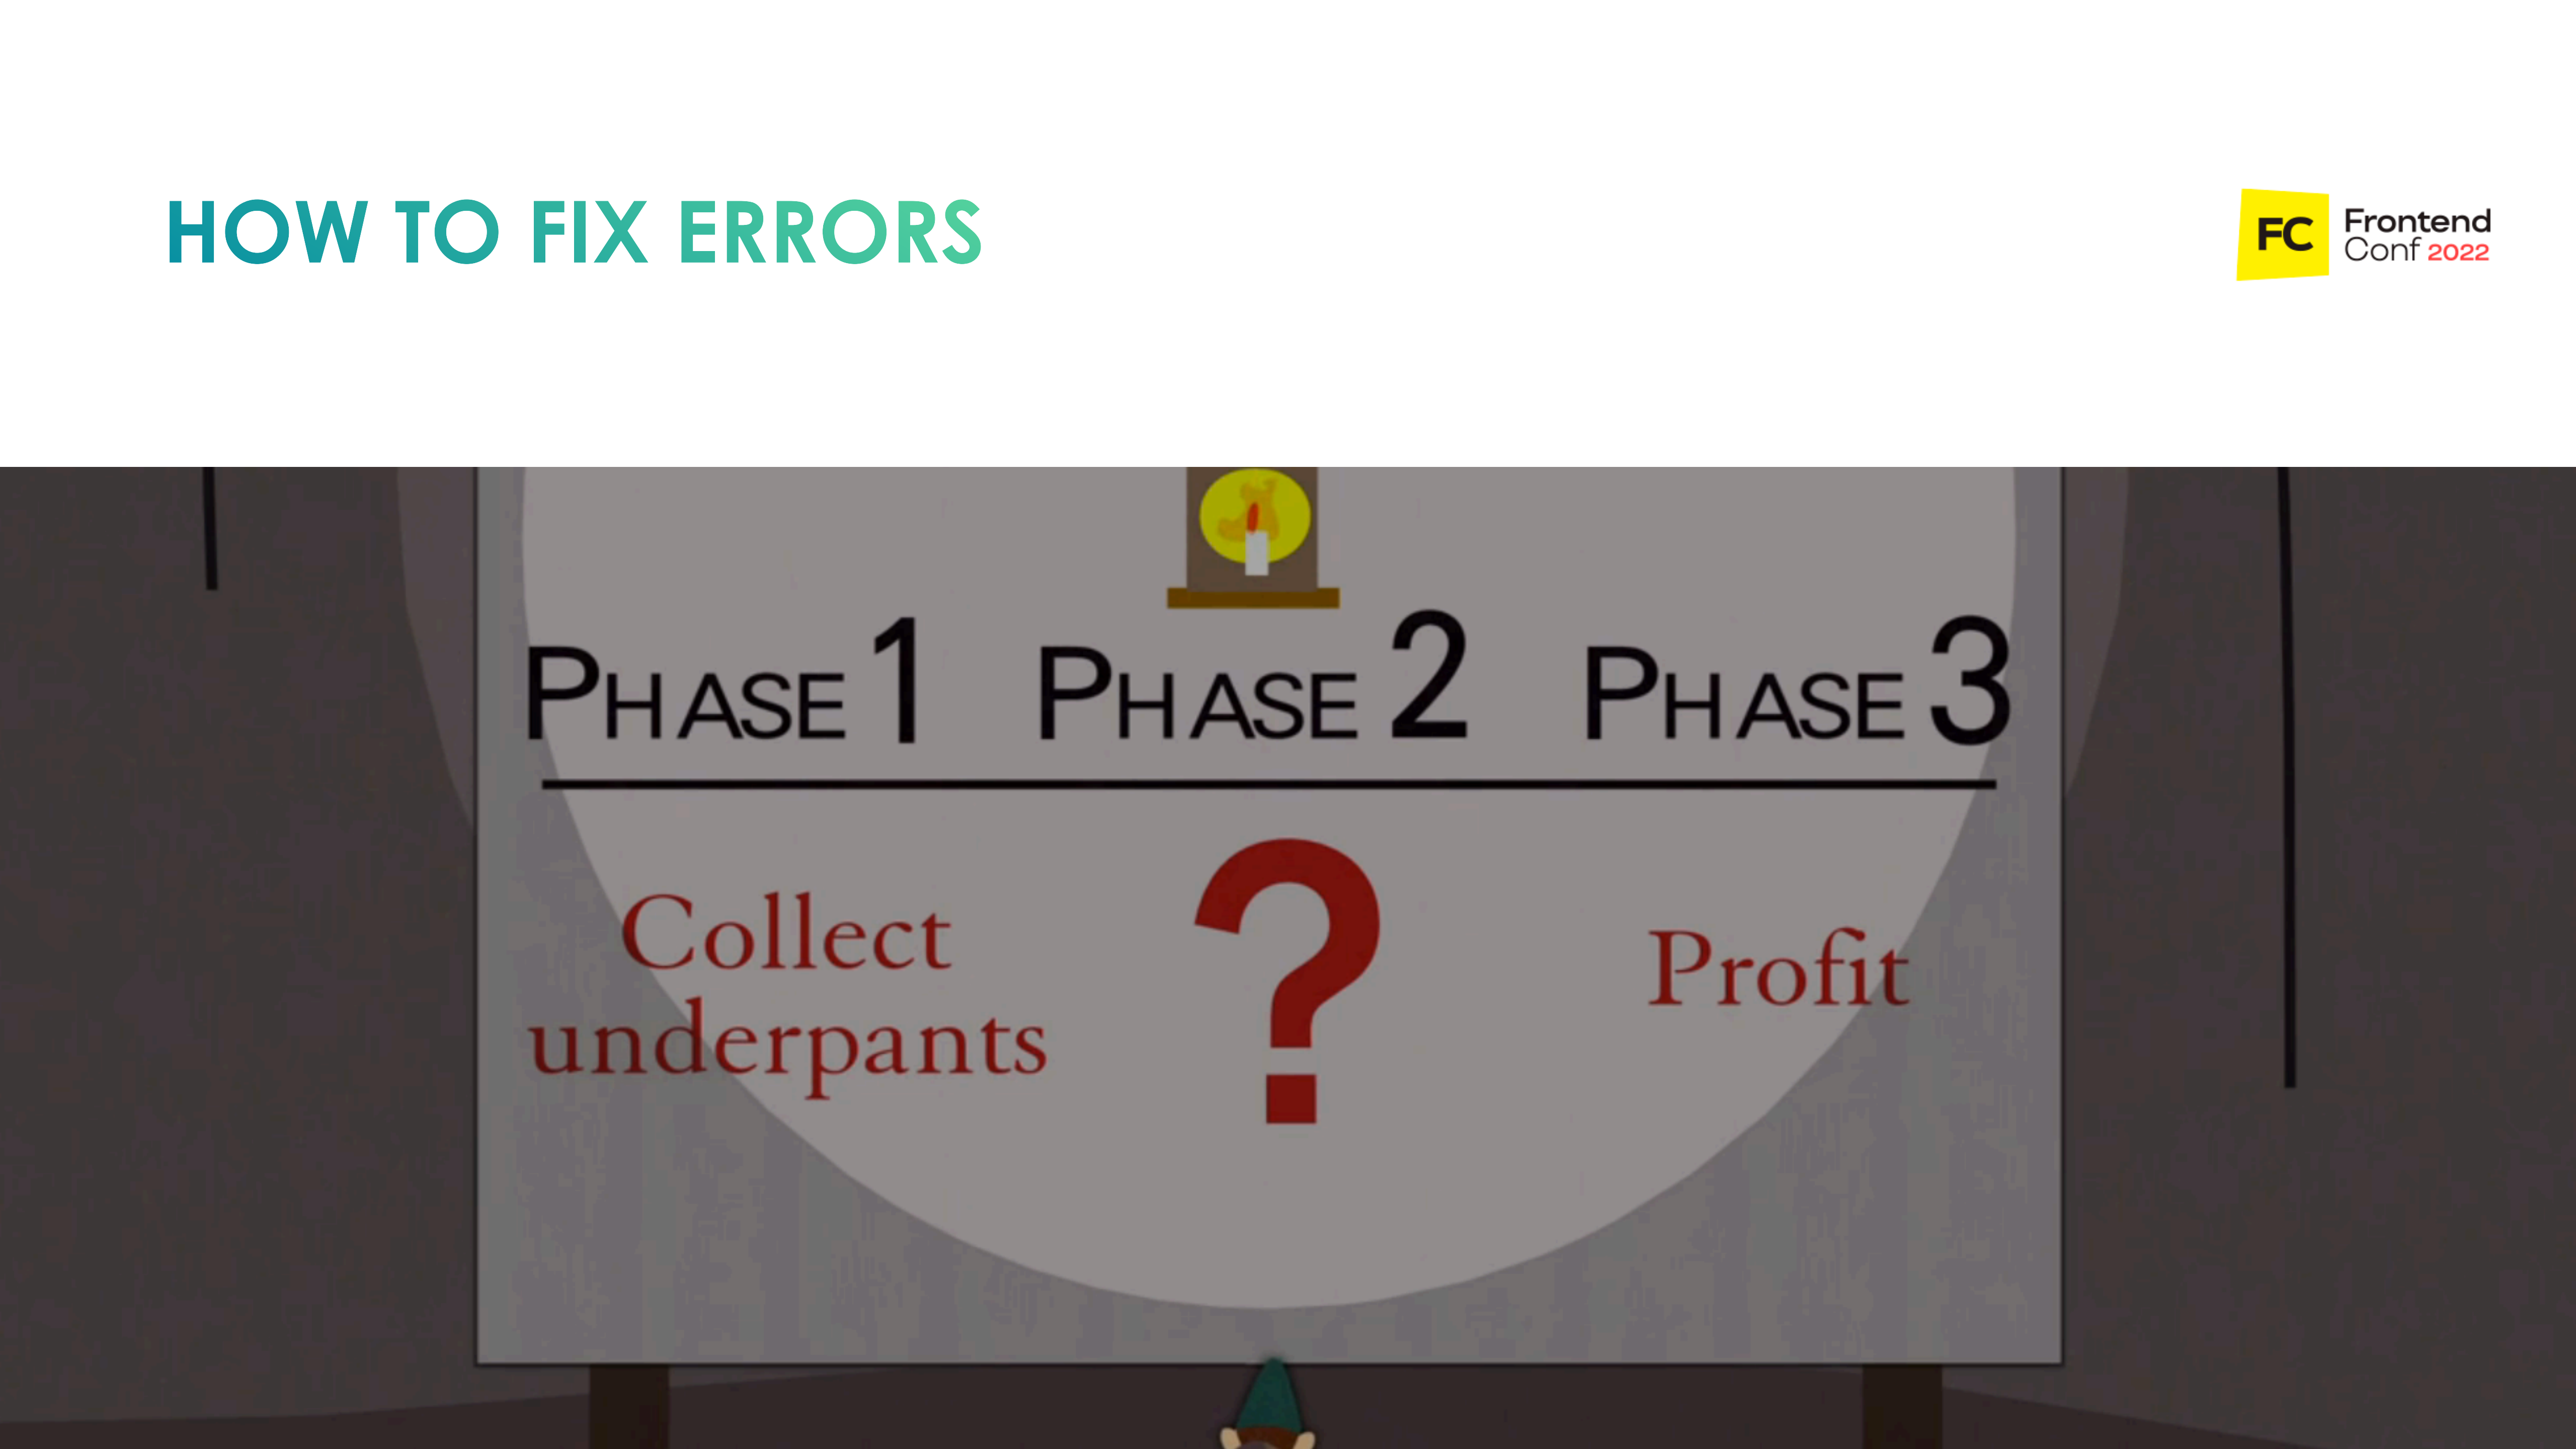

yalc

yalc publish → yalc add @domclick/eslint-config → npm i → **Profit**

yalc publish → yalc update → npm i → **Profit**

`yalc remove --all` → **Profit**

HOW TO FIX ERRORS

PHASE 1 PHASE 2 PHASE 3

Collect
underpants

?

Profit

/Users/dikrasnovskii/buildings_front/src/server/tg.js

9:11 error Unexpected dangling '_' in '_message' no-underscore-dangle

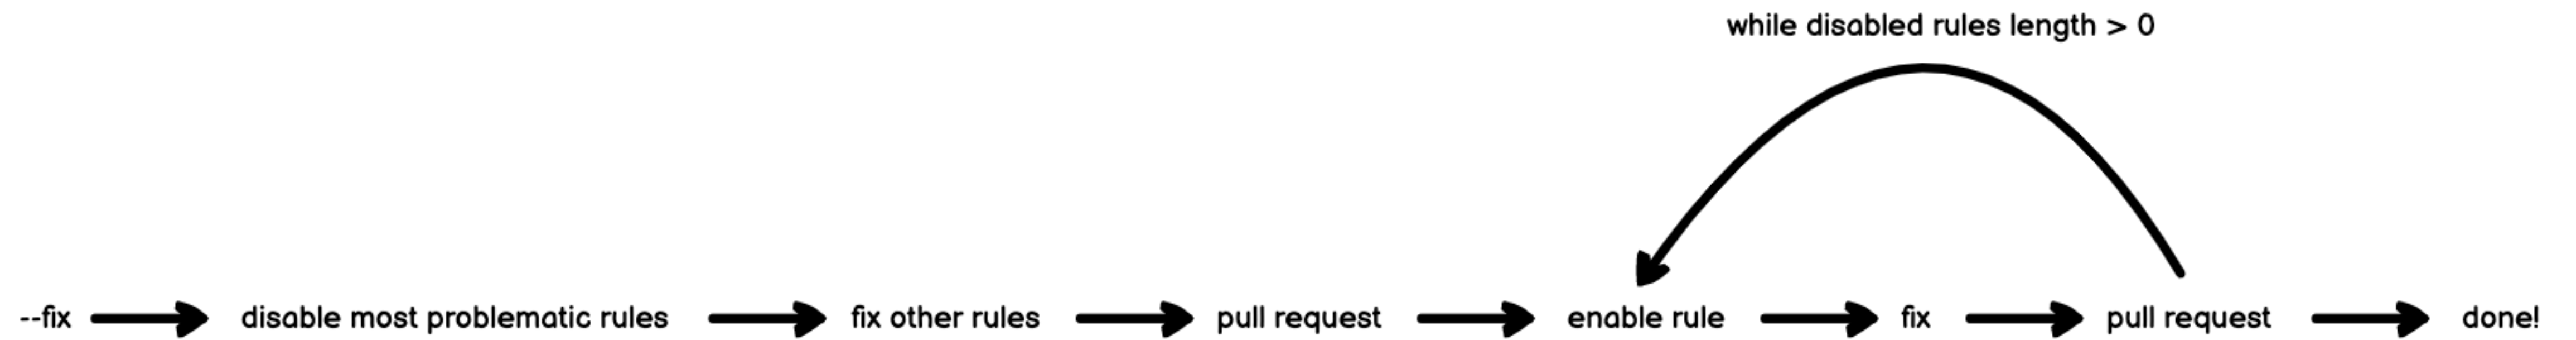

13:38 warning Unexpected console statement no-console

/Users/dikrasnovskii/buildings_front/src/vars.js

37:7 error Unexpected dangling '_' in '__APP_VARS__' no-underscore-dangle

37:7 error 'window' is not defined no-undef

✖ 4564 problems (4530 errors, 34 warnings)

--fix → mark as warning all problematic rules → pull request → just work and fix nearest warnings → 2 years later → done!

EXTRA

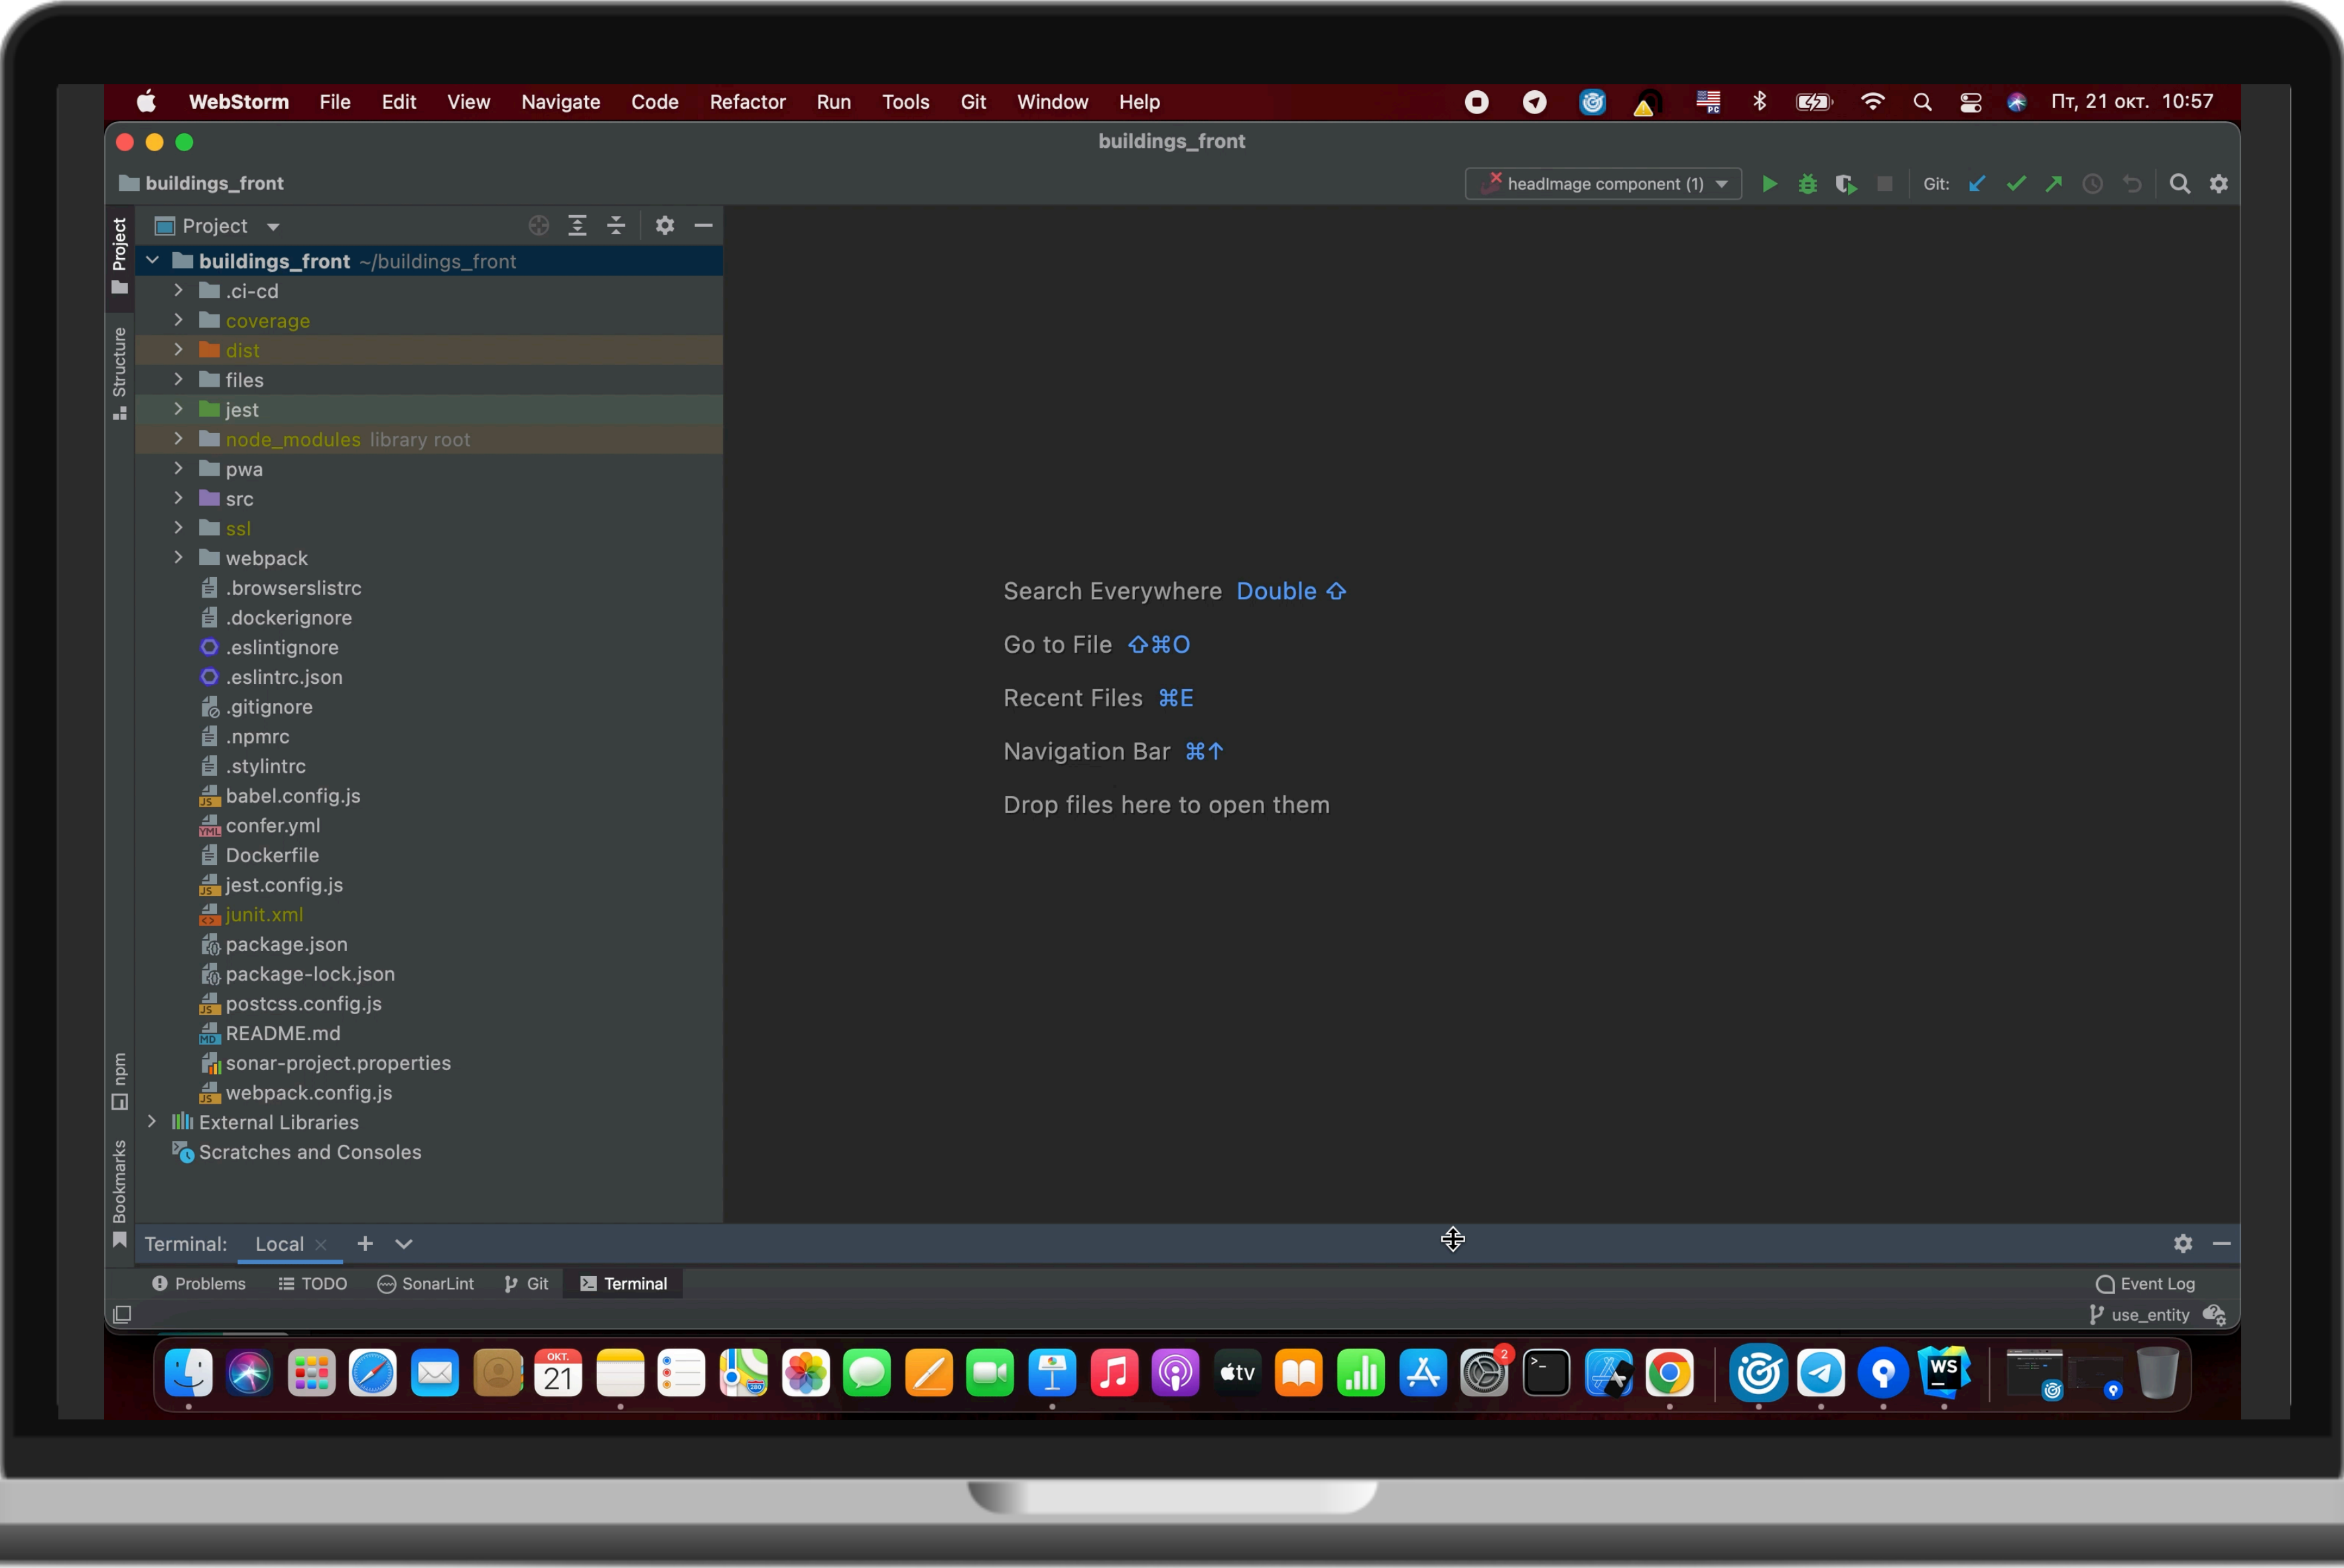

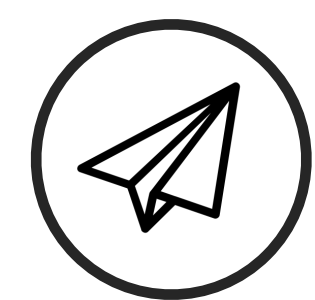

Прочитать
документацию,
понять в чем был
не прав,
исправить

```
rules: {  
  'no-redeclare': 'off',  
  'no-delete-var': 'off',  
  /* мешает */  
  'no-constructor-return': 'off',  
  /* потом исправлю */  
  'no-duplicate-imports': 'off',  
  /* не пойму что хочет */  
  'no-promise-executor-return': 'off',  
  /* а почему бы и нет? */  
  'no-self-compare': 'off',
```
